# CONTENTS OF VOLUME 128

ALIKAKOS, N., P. W. BATES & X. CHEN, Convergence of the Cahn-Hilliard Equation to the Hele-Shaw Model . . . . . 165

BATES, P. W., see ALIKAKOS, N. . . . . 165

BEIRÃO DA VEIGA, H., Singular Limits in Compressible Fluid Dynamics . . . . 313

BEN-ARTZI, M., Global Solutions of Two-Dimensional Navier-Stokes and Euler Equations . . . . . 329

BREZIS, H., Remarks on the Preceding Paper by M. Ben-Artzi "Global Solutions of Two-Dimensional Navier-Stokes and Euler Equations". . . . . 359

CARLSON, D. E., see MAN, C.-S. . . . . 223

CHEN, X., see ALIKAKOS, N. . . . . 165

FREHSE, J. & M. RUŽIČKA, Regularity for the Stationary Navier-Stokes Equations in Bounded Domains . . . . . 361

GALDI, G. P. & A. SEQUEIRA, Further Existence Results for Classical Solutions of the Equations of a Second-Grade Fluid . . . . . 297

GANGBO, W., An Elementary Proof of the Polar Factorization of Vector-Valued Functions . . . . . 381

KOZONO, H. &. T. OGAWA, On Stability of Navier-Stokes Flows in Exterior Domains . . . . . 1

LEONI, G., Asymptotic Stability for Perturbed Hamiltonian Systems . . . . . 105

MAN, C.-S. & D. E. CARLSON, On the Traction Problem of Dead Loading in Linear Elasticity with Initial Stress . . . . . 223

MAREMONTI, P. & R. RUSSO, On the Von Mises-Sternberg Version of Saint-Venant's Principle in Plane Linear Elastostatics . . . . . 207

OGAWA, T., see KOZONO, H. . . . . 1

RUSSO, R., see MAREMONTI, P. . . . . 207

RUŽIČKA, M., see FREHSE, J. . . . . 361

SEQUEIRA A., see GALDI, G. P. ..... 297

SERRE, D., Entropie du mélange liquide-vapeur d'un fluide thermo-capillaire ..... 33

SMOLLER. J. & B. TEMPLE, Shock-Wave Solutions of the Einstein Equations: The Oppenheimer-Snyder Model of Gravitational Collapse Extended to the Case of Non-Zero Pressure ..... 249

TANAKA, K., A Prescribed-Energy Problem for a Conservative Singular Hamiltonian System ..... 127

TEMPLE, B., see SMOLLER, J. ..... 249

XIN, J. X., Existence of Multidimensional Traveling Waves in the Transport of Reactive Solutes through Periodic Porous Media ..... 75
